

# Sixth Annual Sans Souci Festival of Dance Cinema

screen capture from "Helenka" (2008) by Karen Rose

Sans Souci is a niche film festival specializing in dance cinema and incorporating live performance. We screen film and video works that integrate dance and cinematography. Committed to exploration and innovation within the dance-for-camera idiom, an expansive definition of dance, and an appreciation for interdisciplinary forms, we seek to expose our audiences to a variety of film, video, and performance possibilities.

**We truly hope you enjoy your experience at these screenings.**

*Continuously in a state of becoming, the energetic movement interacts with the flows and dynamics of the body, of space, and of image - being at once both factual and abstract. A plurality of events, the performance happening: in digital space, on laptop and camera, on miniatyre stage, via projected image, in performance space, with materials in and on the body of the performer as well as in the collective body and consicuousness of the audience, and in the nongravitational wavy soundscape. *A film about a man and his journey through an outer landscape towards an inner one. Accompanying him on his journey are another man and two women. Together they move through a kind of dream-like state that only a floating life under water can create. There is space in water not only for pleasure and enjoyment but also for the desperate struggle, the resistance of the element, and the lack of oxygen it generates. Life and death. Good times and bad. (ÅKERSBERGA, Sweden)*

Directed by Claudia Kappenberg  
Produced by Andrew Downs  
Choreography and dancing by Claudia Kappenberg  
Music composed by Paul Schütze  
*"Moebius" combines virtual images and physical reality, the past and the present. The starting point for this piece is archive footage of children playing with a giant ball, whereby the ball causes the children to move while the children move the ball. The archive footage is projected onto a body to replay the dynamic of the game; the projected ball becomes the impulse for the body to move, while the body makes visible the images of the past. In this work the body is a kind of moebius strip, an infinite loop of self and other, past and present. (London, UK)*
